Overfort Games - Smart Editor Selection Guide

1. Installation

After downloading and installing the "Smart Editor Selection" package, an icon will appear on the top dock (on the right) in the scene view. This icon can be dragged and placed wherever you prefer in the scene view.

2. Accessing Settings

Click on the arrow in the icon to access the settings. The settings include options for changing the colors, transparency, keys, and more.

3. Activation Keys

The default activation key is "C" for temporarily toggling the selection and "G" for permanently toggling the selection.

4. Changing Activation Keys

To change the activation keys, navigate to "Edit -> Shortcuts" and search for "OverfortGames". Here, you can customize the activation keys as per your preference.

5. Support
